A METHOD OF ALLOCATING COMMUNICATIONS RESOURCES AND A
RADIO COMMUNICATIONS SYSTEM FOR IMPLEMENTING THE METHOD

5

A method of allocating communications resources in a
radio communications system comprising a first subsystem
(1) and a second subsystem (2) using different radio
access techniques and adapted to communicate with radio
terminals (3). The method comprises the following steps:

- determining an indication about the occupancy of
the communications resources of said first and/or said
second subsystem, and
- when a call is to be set up for a radio terminal,
allocating a communications resource of the first or
second subsystem to the call taking account of the
indication so determined.
